

Innovations for a future-oriented food system

Who are we?

Swiss Food Research is the largest **Innovation network** in the Swiss Agro-Food space. As an association with over 190 members from research institutions, companies and start-ups as well as national and international partner networks, we effectively drive innovation in the agro-food ecosystem through knowledge and technology transfer.

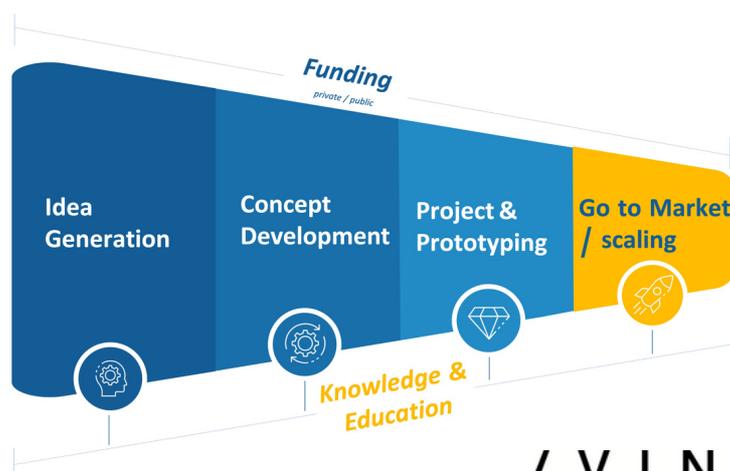

In a nutshell:

- **200+** members
- **150+** guided Innovation projects
- **600K+** CHF project funding
- **70%** of projects were continued

Our Mission

With passion we generate ideas, promote them and let them grow. We drive impactful innovations with a holistic approach for a sustainable agricultural and food landscape.

We provide tools for a successful innovation process. No matter at which stage of development an innovation is, we develop it further!

Innovation promotion

Members from research institutes, companies, and subject matter experts in the field meet to discuss current research and application issues, trend- and demand-driven innovations.

These are our Innovation Groups:

Our principles

- **Passion** for finding solutions for a holistic & sustainable future-oriented nutrition system
- **Holistic approach** as the basis for our actions
- **Sharing of state-of-the-art know how** in the network
- **Neutrality** as the basis for common action
- **Confidentiality** in mutual respect of copyrights, individual ideas and intellectual property
